Ladies and Gentlemen:

IFSCO has done it again... our new catalog affords you unlimited opportunity in design possibilities. We have endeavored to provide a complete and functional line of furniture hardware, keeping in mind your production and cost problems.

Until now, there has always been the problem of obtaining the right part for the right application. All too often, a part had to be used just because it was available, not because it was the needed item. This frustrating problem is now a thing of the past. Our, ever expanding, line offers new flexibility in design and production. We can now provide you with the right part for the job.

Naturally, every item we have cannot be listed in this catalog. Let us know of your particular needs. Our engineering department stands ready to help you with your problems and special applications.

Complete service is yours, whether it be a design problem or a badly needed rush shipment.

We are eager to serve you.

Yours very truly,

IFSCO
